

## Green Industries Best Management Practices, Wednesday, Nov. 4, 2009

### Educational Program Workshop

- This workshop is designed to provide training in Best Management Practices (BMPs) for anyone working in the lawn, landscape, pest control, or municipal grounds areas.
- The Best Management Practices are focused on reducing non-point source pollution resulting from fertilization or pesticide application.
- At the end of this training you will be given a post-test to determine knowledge learned. If the post-test is successfully completed, you will be mailed a Green Industries BMP certificate of completion.
- This training will also satisfy the training requirements for Tallahassee's Fertilizer Ordinance. If you apply lawn & ornamental fertilizers in your job in Tallahassee, you must now receive such certification.
- Be sure to turn in your post-test, your evaluation, by the end of the day.
- If you also need pesticide CEUs, get your signed CEU attendance form before you leave.

8:30 am      *Introduction and Pre-test*

**9:00-9:50      Overview - Green Industries BMPs for Protection of Water Resources in FL**  
History, Background & Overview of the BMP Program & Local Ordinances.
