

2009 Tree ID Lab

Tuesday November 3, 2009 – 9:00 AM to 12:30 PM

Free, annual public education program of
University of Florida/IFAS – Leon County Extension
for professionals, volunteers, landowners, students and citizen-naturalists

Instructed by

Stan Rosenthal, Extension Forestry Agent – Leon Co
Will Sheftall, Extension Natural Resources Agent – Leon Co
Jeff Barringer, ISA Certified Arborist

Advance registration *NOT* required for this “indoor field trip.” You’ll get tips from two experts on how to identify trees & shrubs with leaves that look alike.

- ▶ See, touch and learn ID tips for 100 different species of the Big Bend
- ▶ Specimens mostly natives, with a few invasive exotics thrown in
- ▶ Fresh specimens grouped on tables according to similarity of leaf shape

There’s nothing else like it in Tallahassee – no better way to learn trees, whether you’re a novice trying to get common trees straight, or an expert working on uncommon species.
